Palaeographic description

Halantas. Final M is fairly large, but highly simplified into a tick-mark shape. Anusvāra is normally placed above headline to the right of the character to which it belongs. It is occasionally to the right of the next character, which has been treated as a scribal error, while when it is right atop the next character, as in the toponym Uppolarāmbu in line 17 (and probably maṅgi in line 7), it has been read in the expected place. Other palaeographic observations. The script is a mature alphabet executed beautifully and very neatly.

Apparatus

Plates

<6> -mah_{ja}?<ā><rā><Fragment 1vB> (ja?)[sya] • The extant plate is broken off after *ha*, but part of the next character is still visible in the ASI estampage. I am quite certain it is not an *r*, as its left side is notched in the centre. On the other hand, the word *mahārāja* is certainly expected here, so I assume that the remnant belongs to *ja*, and *rā* was omitted. The ASI transcript first had *mahārā* here, and a later corrector struck out the final *rā*. — <6> sūnuḥ • A word meaning "son" must have been present in this lacuna, but not necessarily at this spot, and not necessarily this exact word.

<7> dh(i)ka- • I cannot propose a restoration for the beginning of this word, except that the word *adhika* is probably involved. Other elaborations of Maṅgi Yuvarāja's epithet Vijayasiddhi refer to him as *vividha-yuddha-labdha-vijaya-siddheḥ*, *abhilaṣita-kāryya-vijaya-siddheḥ*, or (in some of his own grants) *ānvikṣiky-ādi-vidyā-prayogeṣu vijaya-siddhiḥ*. — <7> -siddhi<ḥ> • This emendation is not essential, but I believe it conforms to the composer's intent. — <7> -sampann(o) • The ASI transcript reads *-sammaṇṇa* here. The markers for *o* are very faint; in the estampage, only the end of the left-hand stroke is visible, but some trace of both can be made out in the photos of the original.

<8> _ḥAkaciṁgaṁgasāgara(ma?)<9>_ḥdhya○paripa(m?)ka(m?)? • I am unable to make sense of this string. The reading is quite clear except for the following details. The two *anusvāras* in line 8 are over the two *ga*-s, slightly to the right of centre. Both are quite certainly deliberate, but their intended position may be *gaṁgaṁ*. The last character in line 8 is worn almost completely smooth, but is most likely to be *ma*, and this is also the ASI transcript's reading. The two *anusvāras* in line 9 are less certain. Either or both may be random damage to the plate. The first is over the centre of *pa*, is larger in size, but lacks definition and looks more like a spot of damage to me. The second is above the headline in the space between *ka* and the following *tu*, smaller than the former, but apparently deeper and more sharply circular. The first ASI transcriber read both, but a corrector deleted the second in the transcript. The words *akimca*, *gaṁgā*, *sāgara*, *madhya*, and *paripāka* or *paripakva* present themselves as possible emendations, but I cannot fit them together meaningfully. It is possible that this string is to be joined to the following compound, and we are dealing with a garbled list of *mahādānas*, but none of the terms matches any such name that I am aware of. The closest seem to be *Pañcalāṅgala* and *Saptasāgara*.

<9> -m_{ja}?<ā>nā_ḥ(th)?<dh>ika<10>-dāna-buddhi<ḥ> • I emend tentatively, without being able to make perfect sense of the text. The reading is clear except for *th* near the

end of line 9, where the ASI transcript reads *dh*. I am quite certain that the former was actually inscribed, even though the latter is expected.

<13> paṛantūr- • The ARIE shows this name as Paṛandūr, but the ASI transcript, correctly, has *paṛantūr*.

<14> nārāyaṇa<śarmmaṇa>ḥ • Eyeskip omission has evidently occurred here.

<16> -<diśīm!<diśāyām> • The intent may also have been *-diśi*. Some words, such as *kṣetram dattam/ tasya*, may be missing here, but since the object and the act of giving are recorded in ll19-20, it is more likely that the following list of boundaries is to be understood as a parenthetical insertion in the framing sentence. — <16> ce<17>nu • The ASI transcript reads *cevu*. The character is worn, but quite clear, and *Ervvoka-cenu* is attested in the Cevuru plates of Amma I.

<17> veḷḷeru • The ASI transcript reads *peṭṭeru* corrected to *ceṭṭeru*. An initial *c* cannot be excluded with complete certainty, but *v* is much more likely. The doubled consonant is certainly not *ṭ*, but it may perhaps be *ḍ* instead of *ḷ*.

<19> (sa)<20><Fragment 3rA> hit(aṁ) • What I (and the ASI transcriber) read as an *anusvāra* seems to be connected to the top of the character and to end in a downward hook. It is possible that the engraved text is in fact *sahitā*, with the *ā* perhaps added subsequently, or corrected to or from an *anusvāra*.

<21> ci<rbba?<d bā>dhā • The mark on *bb* is a very slightly sinuous vertical, identical to that in *rjya* (l20), so I read it as a *repha*. It is also possible that this is a subsequently added *ā* marker.

<22> ukta<ṛm?<ḥ> ślokaḥ • The emendation is not essential. The composer may have intended *vyāsenāpy uktam* as a complete sentence, and *ślokaḥ* as a label without any syntactical connection to it.

Translation

Plates

<1-13> Greetings. His Majesty King (*mahārāja*) Viṣṇuvardhana (II) was eager to adorn the lineage of the majestic Chāḷukyas—[who are of the Mānavya gotra which is praised] by the entire world, who are sons of Hārīti, [who attained kingship by the grace of] Kauśikī's boon, who were deliberately appointed (to kingship) [by Lord Mahāsena, to whom the realms of adversaries instantaneously submit] at the <mere> sight [of the superior] Boar emblem [they have acquired by the grace of the divine Nārāyaṇa,

and whose bodies have been] hallowed through washing in the purificatory ablutions (*avabhr̥tha*) [of the Aśvamedha sacrifice]. [His son was] [...] Vijayasiddhi also called Maṅgi Yuvarāja, endowed with the triple powers (*śakti-traya*) of might (*prabhu*), counsel (*mantra*) and energy (*utsāha*). His dear son, the shelter of all the world (*sarva-lokāśraya*), His Majesty King (*mahārāja*) Viṣṇuvardhana (III)—... (*akaciṁgaṁgasāgaramadhyapari-parṁkaṁ*), whose mind is set on generosity beyond measure in the ten kinds of great gifts (*mahā-dāna*) such as the Gift of the Balance (*tulā-dāna*),¹ and whose stature has been substantiated in numerous tanks (*taṭāka*), wayrests (*ārāma*) and temples (*devālaya*)—commands all householders (*kuṭumbin*)—including foremost the territorial overseers (*rāṣṭrakūṭa*)—who reside in the village named Pasapubarru in Gudrahāra district (*viṣaya*) as follows:

⟨13–22⟩ Let it be known to you that we ⟨have given a field⟩ in the eastern direction of this village to the *caturvedin* Keśavaśarman, a resident of Paṇantūr of the Sāṁkṛti *gotra* and the Prāvacana *sūtra*, learned in the six limbs (*ṣaḍ-aṁga*) (of the Veda), the grandson of Nārāyaṇaśarman and son of the *trivedin* Devaśarman. To the east of the field is an oxbow lake.² To the south, the Ervvoka field (*cenu*).³ To the west, Uppolāmbu. To the north, Veḷḷeru. Thus located amid four boundaries, a field comprising (an area sufficient for) the sowing of fifteen *khaṇḍikās* of paddy (*vṛhi*) seed, and a homestead plot together with a flower garden, has been donated with an exemption from all taxes, sanctified by (a libation of) water, on the occasion of an eclipse of the sun. Let no-one pose an obstacle (to this). He who does so shall be conjoined with the five great sins. Vyāsa too has uttered this verse:

1.

He who would seize land, whether given by himself or by another, shall be born as a worm in faeces for sixty millennia.

⟨24⟩ The executor (*ājñapti*) of this provision (*dharma*) is the chief queen (*agra-mahiṣī*) Vijaya-mahādevī.

¹Lists of ten *mahādānas* generally do not include the *tulā-dāna*, which is, however, prominent in lists of sixteen *mahādānas* (Kane 1974, pp. 869–872).

²The word intended here was in all probability *śṛṅga*, although see the apparatus to line 16. I take this to be equivalent to *jala-śṛṅga*, arguably attested in the Elūru grant of Maṅgi Yuvarāja and plausibly interpreted by its first editor as a backwater or an oxbow lake, equivalent to Telugu *nīṭi-kommu*.

³The term *ervvoka-cenu* occurs in the Cevuru plates of Amma I and is probably connected to the Telugu word *eruvāka*.

Commentary

The larger part of plate 3 has been lost since the plate was first recorded by the ASI, so the text of fragment 3rB is only available in the estampage, which only shows a small crack. Plate 1 was already mostly lost when first recorded, but a further small piece, here denoted fragment 1vB, has since been lost, affecting lines 2-6 of the verso of plate 1.

If the seal and the set are genuine, than this is the earliest known occurrence of the seal legend *tribhuvanāṃkuśa* in the corpus. All other known seals of Viṣṇuvardhana III's grants have the legend *viśamasiddhi*, and the next known occurrence of *tribhuvanāṃkuśa* is in the grants of his son and successor Vijayāditya I. The script of this grant is also more akin to grants of Vijayāditya I than to other grants of Viṣṇuvardhana III, so it seems likely that the charter was issued late in, or shortly after, the reign of Viṣṇuvardhana III.

Bibliography

Reported in ARIE 1913–14, p. 11, appendix A/1913–1914, № 9 with a description at ARIE 1913–14, p. 85, § 8. No previous edition known. The present edition by Dániel Balogh is based on photographs taken by myself in February 2023 at the Andhra Sahitya Parishad Museum, Kakinada, and on estampages preserved at the ASI, Mysore, collated with a Devanagari transcript attached to the estampages. Metadata associated with this edition have been published separately in Balogh 2026, available on Zenodo.
